OUR DATA SOURCE: AUTO MARKET DATA

The core data for the franchised and group auto retailer section of WHO'S WHERE 2024 has been sourced from Auto Market Data (www.automarketdata.com), the complete direct marketing solution for the automotive business community.

Auto Market Data offers a full electronic database resource - combined with a design and communication service. Key contacts are telephoned, checked and their details constantly updated; these include the names of owners & directors of franchised outlets and their general managers or dealer principals.

Auto Market Data offers a flexible solution so you can identify your prospects within our industry database, specify your own bespoke data and benefit from a data set that we constantly maintain and update.

We also offer full campaign reporting including full contact details, bounces, open rates, hot prospects and other tools.

Alternatively, ask how we can help with creating your direct mail campaign using post or fax delivery. Access to Auto Market Data is available on either an annual subscription or one-off basis.
